DETAILED ACTION

This Office Action is in response to the Applicants' remarks filed on May 2, 2003.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Admitted Prior Art Figures 15-17 in view of Saitoo et al. (4,984,200).

Admitted Prior Art Figures 15-17 teach a semiconductor device comprising: a plurality of wiring layers **103** disposed in parallel so as to be close to each other with a gap on a base layer **101** which is either a semiconductor layer or a conductive layer, wherein the plurality of wiring layers are a transfer gate serving as a word line, and a plug interconnection is a polypad **104a** & **104b**; conductive polysilicon material containing an impurity; and an insulating layer **108** disposed as to bury the gap and cover the wiring layers. However, Admitted Prior Art Figures 15-17 fail to teach a short-circuit preventing insulating film. Saitoo et al. teach a silicon oxide short-circuit preventing insulating films **28** (Figures 18-19, cols. 23-24, lines 48-68 and 1-68, respectively). Since Admitted Prior Art Figures 15-17 and Saitoo et al. are both from the same field of endeavor (semiconductor devices having data lines), the purpose

disclosed by Saitoo et al. would have been recognized in the pertinent art of Admitted Prior Art Figures 15-17. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the semiconductor device as taught by Prior Art Figures 15-17 by incorporating the semiconductor device having short-circuit preventing insulating films as taught by Saitoo et al. to reduce power consumption and improve electric reliability.

Response to Arguments

Applicant's arguments filed 05-02-03 have been fully considered but they are not persuasive.

Claims directed to apparatus must be distinguished from the prior art in terms of structure rather than function (the problem it solves). *In re Danly*, 263 F.2d 844, 847, 120 USPQ 528, 531 (CCPA 1959). "Apparatus claims cover what a device is, not what a device does." *Hewlett-Packard Co. v. Bausch & Lomb Inc.*, 909 F.2d 1464, 1469, 15 USPQ2d 1525, 1528 (Fed. Cir. 1990).

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re*

Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the motivation to modify the teachings is in the reference Saitoo et al. (col. 24, lines 9-19).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
